

FTS (Fiber Optic Thermal Stripper)

I really hope you to understand how much **Save Time & Cost** by FTS through the below three points. Because most of customers never realized what advantage of FTS.

[Point 1] Please watch the movie [Compare between FTS-900 and Mechanical Stripper.](#)
You can payback U\$500 (price of FTS) within a month.

Stripper	Mechanical Strip	FTS-900
To strip 4 cables	1 min 5 sec	30 sec
Save Time	-	50% save
Save Cost / Month	-	approx. U\$700
Price of FTS	-	U\$500

[Point 2] To meet the same length of all ports, how much dangerous during mechanical stripping!!
Because the workers **have to re-strip all ports again** if one fiber is broken among 8-ports.

[Point 3] **As fiber crack/scratch**, the fused fiber (or Field Installable Connector) stripped by Mechanical Stripper of FTTH Subscriber Unit could be broken easily by subscriber's carelessness. And then FTTH engineer have to visit to the subscriber again (**spend 3 hours at least**).

Item	Mechanical Strip	Thermal Strip (FTS)
Crack / Scratch	occur	none
Fiber Break	often	none
Tensile	low	high
Stripping Time	2~5sec	1sec
Reliability	low	high
Alcohol Cleaning	need	no need
Stripping Length	shorter	longer
Skill	need	no need
Multi-Fiber	impossible	possible
